Reduce, reuse and recycle! These are 3 ways we can do away with waste. Keeping a clean earth is good for our health! If we keep our air and land waste-free, we will be happier and healthier.

It is important to reduce what we buy. Imagine if everyone in the world bought as much as they wanted. Then they did not use everything. We should have a lot of waste on Earth. We should buy less and make smart choices about what to buy. It is better to buy one big container of milk. Try not to buy single-serving cups.

Reusing items is another way to control waste. We can use many things again and share them with others. For example, we should buy reusable forks and knives instead of ones we throw away. Bring cups to the coffee shop and cloth bags to the store. If we have clothing we do not want anymore, host a yard sale or bring them to a second-hand store for someone else to buy.

Many things can be recycled. They can be remade into the same thing or new things. Recycling uses less energy and fewer resources. Aluminum cans, card board, and plastic bottles can be recycled.

What we do with our waste affects our Earth. Keep our planet clean. Reducing, reusing, and recycling are important for the Earth. They are also fun and easy to do!

When was the last time you saw somebody yawn(打哈欠)? Did it make you yawn too? Yawns are contagious. Seeing someone else yawn can make you yawn. Yawns cannot be controlled. You can't stop them

no matter how hard you try. Sometimes even just thinking about yawning can make you yawn. Did you yawn yet?

We yawn our whole lives. Babies even yawn before they are born. Scientists do not know why we yawn. They have some ideas. None of them have been proven yet. One idea is that yawning opens our mouth wide. It lets us take a bigger breath. Scientists studied this. They found that a bigger breath does not make us yawn any less. Scientists also think that yawns keep the lungs healthy. They spread a liquid over the lungs and help air to flow into the lungs, which could be why some sportsmen yawn before they compete.

In fact, in the ancient times, many cultures thought yawning allowed the soul(灵魂) to escape the body. They thought it also let evil spirits enter. People tried to keep this from happening. They covered their mouth when they yawned. Sometimes they used a handkerchief. Other times they used their hand.

People still cover their mouths when they yawn today. It is not because they are afraid they will lose their soul, though. It is just good manners. Many people see yawning as a sign of boredom. It is rude to yawn loudly in front of somebody else.
